

TRACK RECORD – DATA & TELECOMMUNICATIONS NETWORKS

EXPERTISE

Tuckers have the ability to survey proposed sites and evaluate potential IT opportunities, restrictions and costs.

We can benefit Clients by combining our knowledge of latest technology with Construction design and procurement and Facilities Management practices

Conversant with current trends in high speed cable systems, voice and other services over IP, power over ethernet, resilient systems, audio visual integration, wireless networks and terminal server technologies.

We have the expertise to transfer UK/US Corporate requirements and standards to overseas interpretation.
