

## TRACK RECORD – EDUCATIONAL FACILITIES

Design of the M&E services for a new private school in **Richmond**. By using latest software we used passive ventilation to achieve a comfortable, quiet and energy efficient internal environment.

The new Community Centre for the **Salvation Army** in Folkestone incorporated teaching facilities and an assembly room.

We have assisted **Pangbourne College** with the lighting design for their new Science block.

Tuckers work on prestigious building fit-outs in London and overseas has often included the inclusion of educational and leisure facilities. In particular:

**Clifford Chance** new office at Canary Wharf includes a lecture theatre with extensive audiovisual facilities, training rooms and a fitness centre which incorporates a swimming pool.

The work for the **Financial Services Authority** at Canary Wharf included training rooms, a presentation/press conference room, tribunal rooms and a fitness centre.

We assisted the project team employed by **KPMG** for the conversion of office facilities in Watford to a corporate training facility.

### METHODOLOGY

It is evident that education is becoming increasingly closer to commerce, in particular to the service industries. It follows that the facilities and equipment provided for students will need to be closer to what is expected in modern commercial offices.

Tuckers are extremely well placed to advise on how these objectives can be achieved, combining our experience of commercial and public developments. Our particular expertise in economic data cabling can be of great benefit to educational projects

### OTHER PROJECTS

- St Mary's Hospital Medical School
- Brighton University - Rectory building.
- Nottingham University - Halls of residence and chemistry building.
- Cardiff University - Office admin building and biochemistry dept.
- Southampton University - Halls of residence, engineering building
