

## MAINLAND EUROPEAN PROJECTS

Tuckers designed the fit outs of office buildings to provide high class office, meeting and presentation facilities for expansion of London based Venture Capitalist operation for **Cinven** in Frankfurt & Paris.

Tuckers created the reports, design and supervision of Mechanical & Electrical services aspects of various upgrades, refurbishments and expansions for **Lehman Brothers** in Paris, Frankfurt & Geneva.

Due-diligence inspections and project monitoring have recently been carried out on a number of offices, large hotels and shopping developments in Europe for institutional investors.

Tuckers provided the design and supervision of upgrading of equipment rooms in Lille, Le Havre, Lyon, Toulouse, Nantes and Marseilles to suit new telecommunications network. Also a new major telecommunications facility in Paris for **British Telecom**.

Tuckers provided the design, supervision and witnessing of 300m<sup>2</sup> node site to BT standards as well as upgrading the existing room and generator support for the whole site for **British Telecom** in Zurich.

Design of upgrades to existing offices and plant in Frankfurt for Bank of America and Amex.

Tuckers provided assistance for relocation of office, dealing and data processing departments into historic buildings in city centres, for **Salomon Smith Barney** in Geneva, Zurich, Paris, Frankfurt and Milan.

Tuckers provided the design of air conditioning and power distribution for air traffic control consoles including consideration of EMC aspects for **Euro-control** in Maastricht.

### **British Airways - Frankfurt, Stuttgart, Hannover, Paris, Milan, Rome and Madrid.**

Reports, design and supervision for various upgrades of existing facilities and relocations into new buildings.

### **Flyline – Bremen.**

Outline design and supervision of major new build project for telephone sales centre.

## European Projects Continued

### OTHER PROJECTS.

Tuckers carried out a study into construction and procurement methods in France, Holland, Italy and Spain on behalf of THF to enable implementation of Travel Lodge and Restaurant expansion into mainland Europe.

Tuckers provided engineering advice and cost /quality monitoring for "Pont Royal SA", a new golf course, hotel, housing and leisure complex in Southern France and similar duties at the San Roque Golf/Leisure Complex in Spain.

### METHODOLOGY.

For work in mainland Europe, Tuckers have successfully used the expertise of London based engineers for conceptual design, budgets and liaison with UK/American based Clients. Our partners in mainland Europe are well placed to advise on local practices, regulations and to carry out the detail design in some instances. All activities are controlled by a London based project manager who spends as much time as necessary local to the project, but is generally the sole member of our project team to travel, thus keeping costs to a minimum.

Communications between members of our Project Team are maintained by the use of electronic mail facilities, these can be extended to other Project Teams and the Client.

### EUROPEAN PARTNERS.

#### France.

Tuckers have French/English speaking engineers permanently resident in Paris who have recently been engaged in the projects described above.

#### Germany.

Tuckers have a long-standing partnership German/English speaking engineers, architects and project managers in Frankfurt.

#### Italy.

Tuckers have contacts with Italian Architects and Engineers with offices in both Rome and Milan.

#### Switzerland.

Tuckers have arrangements with a Geneva group of Engineers and Architects.

#### Spain.

Tuckers' contact in Madrid is Carlos Langdon with whom we carried out the work on San Roque as described above.

#### Holland.

Tuckers' partner is Eric Cardoza with whom we have worked in the past on the refurbishment of the Amstel Hotel, office and apartment complex.
