

TRANSPORTATION

Tuckers were retained to advise on the M, E & IT aspects of the refurbishment of WAGN's central offices. These included the Service Delivery Centre, their facility for monitoring of train operations for the WAGN offices in London.

Tuckers have been involved with various projects relating to check-in and ticket sales facilities at London Heathrow and other Mainland European Airports. Our responsibilities have included the co-ordination of IT infrastructure for flight information, ticket processing and self-service terminals.

We have also worked on numerous "Terraces" executive lounges in various European Airports for **British Airways**.

Tuckers designed the air traffic control desks, prototype control systems, specialised lighting, air conditioning, motorised seating and work tablets, special EMS precautions, EMS testing and Euro certification for **Euro-control** centre Maastricht.

We designed all services for specialist exploration vehicle workshop and associated facilities for **Seismograph**, West Sussex.

Tuckers have been involved in various large multi-storey car parks in locations such as Ipswich, Colchester and Kingston for **NCP**.

Tuckers designed the Maintenance workshop and paint booths for the **National Express** for the sites below.

Rail Projects:

- Selhurst train workshops - infrared heating to train workshops.
- Victoria Station diesel exhaust ventilation systems for Gatwick express.
- Wandsworth road train workshops – heating and compressed air.

Tuckers were consultant engineers associated with the refurbishment of the existing hangars at **Gatwick Airport** for BCAL/BA, advising and designing motor systems and power pick-up tracking to enable existing doors to meet the requirements of engineering maintenance department.

Also, Tuckers examined and designed life safety systems incorporating snatch blocks and harness runways.

Tuckers designed engineering systems for the motor transport building, including safety systems, maintenance pits, exhaust collecting systems and waste oil recovery.

Bonded warehouse fit out for Flying Tigers, including forklift picking systems and automatic handling.

Conversion of existing hangar for coach washing, together with motor transport maintenance for **Heathrow Airport** (and related areas).

METHODOLOGY

Transportation facilities must now include services to ensure the Health and Safety of staff, passengers and IT systems to ensure that efficiency targets are met. Tuckers aim to utilize knowledge obtained through work in other commercial sectors, together with traditional methods, to produce cost effective solutions.
